

Full study reports that will be provided with the PMN:

For analog

Mammalian Toxicity	Fate And Environmental Toxicity
Dermal Irritation (a)	Activated Sludge Respiratory Inhibition (c)
Eye Irritation (a)	Acute Daphnia Magna (d)
Acute Dermal Toxicity (a)	Ready Biodegradation (e)
Acute Oral Toxicity (a)	Algae(f)
Bacterial Reverse Mutation (b)	Acute Fish (Trout) (g)

(a) (OECD Short-Term and Long-Term Toxicology Groups Final Report, adopted May 1981)

(b) OECD Guidelines For Testing Of Chemicals" - Draft Protocols 419 and 420

(c) Based on OECD Guideline 209

(d) OECD Guideline 202

(E) based on OECD Guideline 301B

(f) OECD Guideline 201

(g) OECD Guideline 203

For analog

Mammalian Toxicity	Fate And Environmental Toxicity
Acute Dermal Toxicity (e)	Chronic Daphnia
Acute Oral Toxicity (e)	
Acute Inhalation (f)	
Skin Corrosion (a)	
Eye Irritation (c)	
Skin Irritation (d)	
Bacterial Reverse Mutation (b)	
OEDC 422 (Oral) (g)	
Repro dev (h)	
28-Day Inhalation Range-Finder	

(a) Department Of Transportation Skin Corrosiveness Test

(b) OPPTS 870.5100 Bacterial Reverse Mutation

(c) OPPTS 870.2400 Acute Eye irritation

(d) OPPTS 870.2500 Acute Dermal Irritation

(e) OPPTS Testing Guidelines for Health (series 870)

(f) EPA health Effects Testing Guidelines, Section 798,1150 Acute inhalation, Sept 27, 1985

(g) OECD Guideline 422 and OPPTS 870.3650

(h) OECD Guideline 414

Additional supporting information can be found for these and other related substances in the REACH dossiers, available at the ECHA registered substances website:
